

1. COUNT

Total number of employees

The screenshot shows a SQL query in a Query Builder window. The query is: `SELECT COUNT(*) AS total_employees FROM employees;`. The query has been executed, and the results are displayed in a table with one row and one column, showing a count of 107.

TOTAL_EMPLOYEES
107

Total number of departments

The screenshot shows a SQL query in a Query Builder window. The query is: `SELECT COUNT(*) AS total_departments FROM departments;`. The query has been executed, and the results are displayed in a table with one row and one column, showing a count of 27.

TOTAL_DEPARTMENTS
27

2. SUM

Total salary of all employees

Worksheet		Query Builder	
1		SELECT	SUM(salary) AS total_salary
2		FROM	employees;
3			

Query Result x	
SQL All Rows Fetched: 1 in 0.009 seconds	
TOTAL_SALARY	
1	691416

Total commission percentage (some values may be NULL)

Worksheet		Query Builder	
1		SELECT	SUM(commission_pct) AS total_commission
2		FROM	employees;
3			

Query Result x	
SQL All Rows Fetched: 1 in 0.008 seconds	
TOTAL_COMMISSION	
1	7.8

3. AVG

Average salary of employees

Worksheet	Query Builder
1	<code>SELECT AVG(salary) AS avg_salary</code>
2	<code>FROM employees;</code>
3	

Query Result x
    SQL All Rows Fetched: 1 in 0.006 seconds
AVG_SALARY
1 6461.831775700934579439252336448598130841

4. MAX & MIN

Highest and lowest salary in EMPLOYEES

The screenshot shows a SQL Query Builder interface. The 'Worksheet' tab is active, displaying the following SQL query:

```
1 SELECT MAX(salary) AS highest_salary,  
2     MIN(salary) AS lowest_salary  
3 FROM employees;  
4
```

Below the query editor, the 'Query Result' tab is active, showing the results of the query. The status bar indicates 'All Rows Fetched: 1 in 0.005 seconds'.

	HIGHEST_SALARY	LOWEST_SALARY
1	24000	2100

Highest and lowest max salary in JOBS

The screenshot shows a SQL Query Builder interface. The 'Worksheet' tab is active, displaying the following SQL query:

```
1 SELECT MAX(max_salary) AS highest_max_salary,  
2     MIN(max_salary) AS lowest_max_salary  
3 FROM jobs;  
4
```

Below the query editor, the 'Query Result' tab is active, showing the results of the query. The status bar indicates 'All Rows Fetched: 1 in 0.002 seconds'.

	HIGHEST_MAX_SALARY	LOWEST_MAX_SALARY
1	40000	5000

5. GROUP BY

Employees per department

Worksheet		Query Builder
1		<code>SELECT department_id, COUNT(*) AS num_employees</code>
2		<code>FROM employees</code>
3		<code>GROUP BY department_id</code>
4		<code>ORDER BY department_id;</code>
5		

Query Result
